Epson **EB-D6155W & EB-D6250**

DATASHEET

Enjoy high-quality presentations in challenging environments trouble-free with the new EB-D6155W and EB-D6250 dust-proof projectors.

Designed to withstand extreme conditions, these robust projectors are ideal for organisations based in locations where dust and sand are a constant issue. The projectors are also suitable for public displays in large enclosed spaces such as factories, clubs, arenas, education establishments and churches.

The exhaust shutter system automatically closes when the projector is not in use, while the optical engine is encased in glass, providing enhanced protection. The electrostatic filter can last up to 10,000 hours before replacement and an easy-access E-TORL lamp runs for up to 4,000 hours, ensuring low maintenance and total cost of ownership.

The EB-D6155W delivers a high White and Colour Light Output of up to 3500 lumens and WXGA (1280 x 800) resolution, enhanced by 3LCD technology, to provide superb quality, widescreen images. The EB-D6250 delivers images up to 4000 lumens with XGA (1024 x 768) resolution. Both projectors are supported by a high-performance 5W integrated speaker and come with HDMI connection for top-quality digital images and sound through a single cable.

The projectors are straightforward with a series of advanced features for easy installation, multiple input capabilities, a split-screen function and optional Wi-Fi. Users can liven up their presentations with direct connection to the ELP-DC06 document camera for close-up object visualisation.

KEY FEATURES

- Electrostatic dust filter
- Automatic exhaust shutter
- HDMI connection
- High Colour Light Output
- Optional wireless connectivity
